Underwater Housing for Canon 5D MkII

Made of 6061 aluminum, 10Bar Housing is a sturdy choice for the Canon 5D Mk II camera. For those who favor simple and compact housing, it is the ideal one to suit their needs.

It is equipped with full-function control buttons, bulkhead connector for external flash and interchangeable ports for various lens. The new port adaptor ring system allows the use of existing ports from other brands. For the closure, the double o-ring and key hole lock design provide ease of use and added security. Now you can use the professional camera underwater at an affordable.
